- Relevant courses: Object Oriented Programming, O.S, Data Structures, DBMS.
- GPA: 9.49 / 10

PUBLICATIONS

SCI Journal Publication

- Yachana, Navroop Kaur, Sandeep K. Sood, “A Trustworthy System for Secure Access to Patient Centric Sensitive Information”, Telematics and Informatics, **Elsevier Ltd. Indexed in SCI, Thomson Reuters. (Impact Factor: 3.34), DOI:** <http://dx.doi.org/10.1016/j.tele.2017.09.008>.

PROJECTS

Mw Cars

(PG DIPLOMA PROJECT)

- Technology Used: MEAN STACK
- Developed web application which is used to showcase car models available from database (Mongo DB) and on request various CRUD operations can be performed for SPA application.
- User will use services to interact with data through Restful API that is HTTP methods and get response from database.
- Various components designed to make reusable block of code for front-end.
- **GitHub link:** <https://github.com/yachnamahajan24/MW-Cars-MEAN->

COVID-19

(PG DIPLOMA PROJECT)

- Technology Used: D3.js library
- Dashboard which is used to visualize dataset containing statistics on COVID-19 with some of the graphs displaying most effected and least affected countries.
- It takes data as .csv and .geojson and uses it in a variety of ways.
- Four graphs included in the project with addition of interactive features are Bar chart, Globe, Map and Pie Chart.
